Investment Summary - FTM B Class

FTM B Class builds on the success of FTM A Class and is also based upon the same strategy that won three awards as Best Fixed Income Fund offshore in the past 2 years. It's also the same strategy that has been in used by the receivables company since 1997 and never had a negative year.

But, because 5 cases are reviewed to find the one that meets FTM A Class's criteria there are often other cases that almost make the grade. It is these cases that meet 95% of our original criteria that FTM B Class will fund. FTM B Class can also fund receivables generated from MRT's, from trauma centers and anesthesiologist and a host of other medical receivables as long as the safety and margin are there.

Unlike the A class which receives a fixed rate of return for the receivables and is only impacted by the amount of receivables held in proportion to other investments within the portfolio FTM B class will share directly in the profits from successful cases.

However, it is estimated that over a 2 year period the average annualized return to FTM B Class net of fees will exceed 20% - 24% but faster settlements and turnaround times could increase the returns even further.

Investment Information

Minimum Investment	\$10,000 USD
Minimum Top-Up	\$1,000 USD
