Investment Summary - FTM MR Class

FTM Class D+ is perfect for investors wanting to generate cashflow on a quarterly basis to supplement their income needs as it generates 10% per annum with simple interest of 2.5% being paid out quarterly.

The way it works is that shares are purchased at \$100 and always remain at \$100 but pay out \$2.50 per share every quarter which totals \$10 per year.

The investment strategy and philosophy is similar to the investment strategy of FTM Class A which has won 8 awards in 7 years and achieved an annualized compound return of 8.82% which would equate to 11.53% ($80.73\% / 7 = 11.53\%$) simple interest annualized over the 7 years.

However, in the case of D+ there is no cash component except for the quarterly payments which are paid out instead of rolled and reinvested and as such the investment requires a 2-year lock-in.
